

THE “ROCK-n-ROLL”

Single Auger System for No-Till Drills

Kasco's exclusive "Rock-n-Roll" Single Auger System for grain drills offers an economical and easy way to fill the seed hopper on no-till drills. The system incorporates a vertical auger mounted on the drill with a single pivot point. The auger's hopper sets on the ground beneath your gravity wagon, eliminating the need for a wagon auger. The hopper remains in the same spot on the ground; no need to move the wagon.
